Let us introduce you

communia

Let's build a better society, together.

communia

The game changing community concept.

PROBLEM In today's fast paced world, dominated by technology and overwhelming digital content, people spend less and less time helping each other and improving their communities. Population's total indifference to beneficial common goals is one of bigger challenges for local communities.

HOW IT WORKS? By being useful members of **communia**'s community and performing activities like recycling, maintaining the yard, volunteering for charity work, helping others, paying bills on time and doing other simple, yet beneficial tasks, participants will receive **communia** currency payouts to their wallets. These funds can be used to cover different communal services (monthly bills, cultural and sport events), for other services provided by community members (help around the house, babysitting, fixing plumbing etc.), or they can be shared within the community members.

By helping others and positively contributing to the community, its members earn currency tokens that can be used to improve the quality of their lives.

FUNCTIONALITIES
Citizens can be rewarded automatically (e.g.) for paying bills on time) or manually – by local government reps and employees (e.g. for recycling) or by their neighbors (e.g. for helping around the house).

CITIZENS are being rewarded with the **communia** coins for as many positive contributions as the local governments allows, such as:
- recycling and waste sharing
- paying communal bills on time
- helping others doing household jobs (fixing plumbing, babysitting, etc...)
- keeping the yard clean
- volunteering and charity work
- proper use of public parking lots
(...)

Citizens can use **communia** coins for:
- pay the bills for the communal services provided by the local governments (water, waste, etc...)
- pay for the tickets for various events organized by the local government or local public organizations
- pay for various services provided by other community members (babysitting, plumbing, gardening)
- give coins to other family members or friends or donate them to other charity organizations
- give microloans to other community members
(...)

LOCAL GOVERNMENTS can use the **communia** platform for:
- getting feedback on their services
- organizing a poll and include the citizens in the process of making decisions on important local issues (infrastructure, etc.)
- improving the local waste management system pursuing the recycling processes
- organize funding for specific projects (e.g. school roof replacement, organizing events...)
- give microloans to other community members
- making the public and private records more approachable (e.g. land registries, birth certificates)
- give the citizens unique local digital identity in order to organize a more efficient local government
(...)

CITIZENS' BENEFITS
Connecting with the local community
Working together towards positive goals
Improving personal quality of life by improving it for all members
Reducing the cost of communal services
Social inclusion

LOCAL GOVERNMENTS' BENEFITS
Democratization of local communities
Improved communication with the citizens
Better aligned activities with members' needs and wishes
Stronger social relationships within communities
Increased well being of members - resulting in positive demographic developments

> "
> Our vision is to support both local communities and governments to enhance the social capital and build a better place for sustainable living.
> "

SUGGESTED IMPLEMENTATION TIMELINE

communia can be implemented within six months in any local communities, and its results can be measured immediately.

JUNE
kick off meeting

JULY
defining the functionalities

AUGUST – OCTOBER
customization of **communia** platform for specific local community

NOVEMBER
testing period with a number of citizens

DECEMBER
full implementation

This City is what it is because our citizens are what they are.

- Plato, *The Republic*

IMPLEMENTATION POSSIBILITIES AND OPPORTUNITIES
This project can be realized in a private-public partnership and could be applied to most global societies, depending on interests and ability of local government institutions.

Being part of this system can lead to better acceptance and understanding of blockchain technology which can lead to its implementation for digital identity, voting, medical records and many other exciting opportunities.

EXPECTED PROJECT DEVELOPMENT TIMELINE

communia will be ready to implement in **Q2 2020**.

Q3 2018
idea conceptualization

Q4 2018
strategic partnership development

Q1 2019
feasibility and technical study high scale local government's conference with presentation of the project – market survey

Q2 2019
IoT, AI and big data & analytics integration

Q3 2019
first testing and public presentation

Q4 2019
worldwide presentation and marketing expansion strategy

Q1–Q2 2020
final platform development, testing and launch

Let's see how the **communia** works.

This project's mission is **TO BUILD HAPPIER AND MORE HUMANE COMMUNITIES** by connecting its members and rewarding them for positive contribution.

Local communities are building blocks of each nation so a successful implementation can greatly benefit society in general by promoting helping and caring for others.
